## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2667

*Election/Restriction*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 16-28 and 44-62, drawn to a photonic area network that distributes bandwidth segments to multiple external networks associated with wide signal bandwidth multichannel access, classified in class 385, subclass 33, 52, 147 and class 359, subclass 110, 119, 123, 124, 128, 136, 173.
  - II. Claims 29-43, drawn to a photonic area network that distributes bandwidth segments to multiple external networks associated with wide signal bandwidth multichannel access, classified in class 398, subclass 43.
2. The inventions are distinct, each from the other because of the following reasons: The inventions are distinct, each from the other because of the following reasons. Inventions I and II are related as combination and sub-combination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the sub-combination as claimed for patentability, and (2) that the sub-combination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the sub-combination as claimed because a photonic network distributing wide signal bandwidth that provides multiple access communication, and whose architecture includes multiple set top box circuits can be associated with utilizing any wide signal bandwidth channel and does not require the particulars of the wide signal bandwidth as claimed in claims 29-43. The sub-combination has separate utility such as the wide signal bandwidth channel is a separate from the claimed photonic network distributing bandwidth segments.

Art Unit: 2667

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventor-ship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventor-ship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
